

# Time Manager

---

Kickoff

T7 - MSc Pool

---

T-POO-700

# Immersion period

The objectives of the pool are:

- introduction to new technologies ;
- increase your skills in the fundamental areas ;
- getting familiar with new working methods.

# Project

Time Manager:

- to be proud of ;
- learning by doing ;
- evaluated at the end of the pool ;
- by group.

# What do we expect?

- be **rigorous** and **conscientious** ;
- be **smart**: train yourself when needed, go faster otherwise ;
- help each others, discuss, **collaborate** ;
- do not think about your grade ;
- focus on your **skills**!

# The 7 wonders

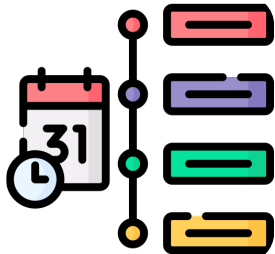

The pool is divided into 7 themes:

- back-end & API ;
- front-end & UX/UI;
- devops & deployment ;
- digital transformation & change management ;
- authentication ;
- mobile dev ;
- cyber security.

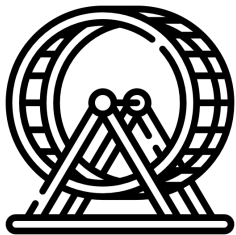

# Timeline

- 3 tremendous weeks ;
- work at your **own rhythm** ;
- new theme **every ~2 days** ;
- use spare time to **work on your project** ;
- **reinforce** your weaknesses (by completing past themes).

# Activities

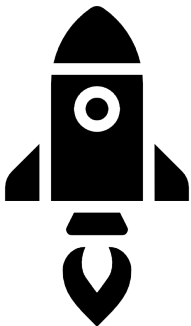

Each theme includes various pedagogical activities:

- kick-offs ;
- bootstraps ;
- mini-projects ;
- debriefs.

# Kick-offs

- to open ;
- to tease ;
- to launch ;
- to exchange ;
- to contextualize.

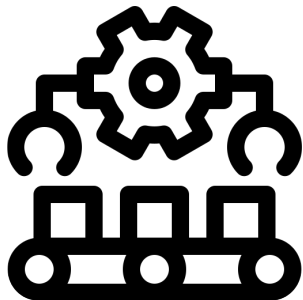

# Bootstraps

- a training experience ;
- some skills acquisition ;
- many self-assessments (do I need to dig deeper?) ;
- precious help to pull your projects on.

## Mini-projects

- isolated brick of the project:
- associated to specific notions ;
- logically scheduled ;
- often re-usable almost as it is in main project.

# Debriefs

- frequent ;
- collective ;
- for bootstaps and projects ;
- to encourage reflexivity.

# What do we expect? (yes, once more)

- be **rigorous** and **conscientious** ;
- be **smart**: train yourself when needed, go faster otherwise ;
- help each others, discuss, **collaborate** ;
- do NOT think about your grade ;
- but focus on your **skills**!

# Any questions
